1. **Question(MATH-12.10.5.17):** Let  $\vec{a}$  and  $\vec{b}$  be two unit vectors and  $\theta$ is the angle between them. Then  $\vec{a} + \vec{b}$  is a unit vector.

**solution:** As given two vectors a and b are two unit vectors and  $\boldsymbol{\theta}$  is the angle between them, then, |a| = |b| = 1

Now, 
$$(a + b)$$
 is a unit vector if  $|a + b| = 1$ 

$$(a+b)^{2} = (a+b).(a+b) = 1$$

$$a^{2} + ab + ba + b^{2} = 1$$

$$1^{2} + 1^{2} + 2ab = 1$$

$$a^2 + ab + ba + b^2 = 1$$

$$ab = \frac{-1}{2}$$

$$|a||b|\cos\theta = \frac{-1}{2}$$

$$\cos\theta = \frac{-1}{2}$$

$$\theta = \cos\frac{-1}{2}$$

$$\theta = \frac{2\pi}{3}$$

$$\cos \theta = \frac{-1}{2}$$

$$\theta = \cos\frac{2}{1}$$

$$\theta = \frac{2\pi}{3}$$
